Open Culture Foundation (OCF)

Open Culture Foundation: Connecting Tech Communities for Open Innovation and Digital Rights in **Taiwan**. As a non-profit since 2014, we support over 30 open tech communities, advocate for digital human rights, and foster a transparent and inclusive digital civil society. Join us in promoting open co-creation and shaping the future of technology in **Taiwan**.
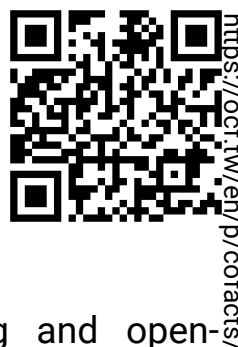

Community Projects

Civil Society Cyber Shield（CSCS）

Citizen groups often face cyber threats without adequate resources for defense. Civil Society Cyber Shield, leveraging Taiwan's expertise in information security and civil society, bridges the gap between tech experts and citizens. Our mission is to enhance the information security of citizen groups by fostering collaboration between these two essential communities.

Cofacts（fact-checking）

Established in 2016, Cofacts is the pioneering open-source fact-checking chatbot fighting misinformation in closed messaging apps. Run by volunteers and developers, we conduct media literacy lessons and fact-checking workshops, promoting civic collaboration and freedom of speech. Our innovative approach, combining collaborative fact-checking and open-source tools, effectively counters misinformation, propaganda, and fraud. Cofacts' success can be replicated internationally for collaborative efforts.

Accomdemy = Accompany + Academy

Discover Accomdemy.org, the open-source co-learning community for tech enthusiasts. Our vision is to use technology to make self-learning enjoyable and collaborative. Amidst the changes brought by the COVID-19 pandemic, co-learning has proven to be a motivating path, leading to software/hardware developer jobs. Join over 1,000 individuals learning diverse topics like Embedded AI, Computer Vision, 3D Printing, Robotics, and more. Learning is easier and more fun with our supportive community!

## Conference for Open Source Coders, Users and Promoters (COSCUP)

COSCUP's aim is providing a platform to connect Open Source coders, users, and promoters, and promote FLOSS with the annual conference. The conference is free to attend because of the enthusiastic sponsors and donators. Since the conference venue is limited, tickets are often sold out immediately after the online registration starts.

g0v Hackathons

Join g0v Hackathon – a bi-monthly community event since 2012. Enjoy good food, beverages, and collaborative project development in a cross-disciplinary platform celebrating openness and open source. Explore innovative solutions with our tripartite approach, leveraging expertise, IT knowledge, and crowd collaboration. All g0v projects are open source, released under open source licenses.
